initiative»)**

The History of the Movement

Gatchina ecological movement was registered in 1990. Then with entering specialists, scientists from St.Petersburg, it transformed into the Movement «Gatchina—St.Petersburg». In 1994 schoolchildren and teachers from Gatchina district joined to the Movement and take part in this work actively. In 2000 schoolchildren and teachers from Kronshtadt joined to the Movement. The Ecology Movement has become named «*Gatchina — Gatchina region - St.-Petersburg - Kronshtadt* ». It associates scientists, specialists, teachers, schoolchildren and students, working on the program «School ecological initiative» under the slogan «Ecology. Safety. Life». More than 300 men participate in the Movement activity annually.

The Movement Activity Directions

1. Carrying out summer *ecological camps*, working on the base of PNPI, where schoolchildren has laboratory and field investigations on the radiation, chemical, biological and other kinds of control (water, air, soil, meals), study the risk factors, children's health of their region and microregion, and also develop projects on the ecological situation improvement of their place. There are excursions on the places of interest and games in the frame of camps.
2. Carrying out *scientific-practical conferences* of schoolchildren and students, working on the program «*School ecological initiative*».
3. Preparation, edition and publish of the *information-research issues* «*Ecology. Safety. Life*» on the program «*School ecological initiative*» with articles of schoolchildren and students, specialists and teachers.
(Up to 2001 13 issues were published, which texts are located in Internet www.eco.nw.ru).
4. Carrying out interregional competitions of *pictures and placards on the ecology topic* «*The Nature is your home. Guard it!*» in the Gatchina library № 2.
5. Carrying out *competitions of literature and art creature* on the topic «*The water world by children eyes*».
6. Carrying out labor «*landing*» to clean parks and lakes.
7. Participation in the ecological actions in the Russia.
